

Furniture for people

Refreshingly different: *Cegano*

Cegano – a striking and attractive character that sets itself apart. This intelligent desk system unites streamlined, modern design with practical functions for all the challenges of modern office life.

The filigree, unmistakable form is also impressive for its stability and durability. After all, Cegano comes from C+P, the market leader for steel furniture.

Round. Square. Attractive.

Two shapes – one system:
Cegano desk systems are optionally available with a round-tube frame...

... or a square-tube frame, just as you wish. Both variants are height-adjustable from 650 - 850 mm, so they can be adjusted perfectly for every user.

A remarkable feature of Cegano is its range of variants. Both frame shapes offer a large number of top shapes and materials as well as numerous linking and combination options – from a classic individual desk through to multiple configurations with flexible wall systems. So you are perfectly equipped to deal with all tasks – including any future changes.

Cegano shapes rooms.

Cegano from C+P stands for a complete workstation system with solutions for every application. How would you like to furnish your room? From the tried and tested double workstation to modern 120° group workstations and even a workbench solution – anything is possible. You have the office. We have the furniture.

Modern

*White surfaces. Chrome
and glass. Transparency.
Attractive storage
space: the pure office!*

Convenient height adjustment:
User-friendly and future-proof height adjustment from 650 - 850 mm, adjustable in 10-mm steps.

Both excellence and fascination are easily recognizable. The product personality of Cegano is characterized by an unmistakable "runner" design. A formal language where straight lines are attractively combined with soft curves. The chrome-plated version of the runner is not only sophisticated, but also immensely resistant thanks to its durable surface.

Unmistakeable.

In this successful interplay of contrasts, the filigree runner encloses the robust, black-grey core.

Raster height adjustment:
The height adjustment works quickly and simply with socket head screws...

...or a quick-action lock in the square-tube frame and is convenient to use.

Satin-finish glass:
In doors and shelves. For an even more sophisticated cupboard look.

High-tech in the office:
Fully extensible pull-outs with parallel control, a self-closing system and an anti-tilt mechanism. Optionally available with soft closing silencers.

Beautiful and functional:
The Cegano design runner – here in the chrome-plated design.

Symbio sideboards:
Cupboards from the Symbio range and Cegano desks match together perfectly.

The timeless design of Cegano makes it easy to select office cupboards. Combining it with the Symbio cupboard system is just one of numerous ideal options. You can choose from an extremely wide range of cupboard variants – from the double-door version to the drawer model. Mix and match your own “feel-good office” with desks, cupboards and pedestals from C+P.

Cable aperture sockets:
The cable aperture sockets may be positioned at any point on the desk. They are available in plastic or in a metal design with a brush insert.

Moving on up

*A sit/stand dynamic.
Black-grey steel. Satin-
finish glass. Cherry decor:
an office of the highest
quality!*

C+P is well known for seamlessly integrating the sit/stand dynamic into all its office ranges. Life is movement! And good furniture gives you the necessary freedom to move.

Sit. Stand. Move.

The Cegano range offers you the choice: would you like to extend your workstation with an ergonomic sit/stand work area using the mobile occasional table? Or does the sit/stand desk with telescopic height adjustment (pneumatic or electric) suit your concept better?

In either case, the same applies: stand up more often – and stay fit!

Sit/stand occasional table:
Height-adjustable, mobile occasional tables bring movement to the office and are ideal for efficient brief meetings.

Simple adjustment:
Thanks to the manual release for the pneumatic spring directly under the desk, you can quickly reach the desired height (685 - 1100 mm).

Mobile freedom:
The casters integrated in the base plate provide ideal leg room. With them, you can place the occasional table in the right position in a flash.

Pneumatic height adjustment:
 The Cegano version with pneumatic height adjustment is fitted with a T-frame made of rectangular tubes. The pneumatic spring is available in various lifting power ranges to suit different table loads. The optional casters guarantee unlimited mobility.

Symbio cupboards:
 The Symbio cupboard system harmonizes beautifully with Cegano.

Electric motor:
 The electric height adjustment is available on request with memory control.

Double telescope (pneumatic spring):
 With an adjustable height of 650 - 1250 mm, the double telescope assures compliance even with future standards.

Dark-light contrast:
 In white aluminium, white or chrome, the runner provides an attractive dark-light contrast with the black-grey core.

The sit/stand desks with telescopic height adjustment are far ahead of their time. With an adjustable height of 650 - 1250 mm (pneumatic or electric double telescope), they assure compliance even with future standards, strong lifting power and a high adjustment speed.

Double telescope (electric):
 The Cegano version with electric height adjustment is fitted with a C-frame made of square tubes. It is also available with double telescope and a height adjustment range of 650 - 1250 mm.

Cosmopolitan

Wooden floor. Inspiring views. Metallic and natural shades. Systematic order: a high-level office!

Desktop organizers:
The railing set for desktop organizers can accommodate several organizational helpers.

Greeting, welcoming, discussing briefly while standing up – the reception point for visitors promotes spontaneous communications and can also easily be connected to a desk later.

You're always welcome.

Our upgrade concept offers even more options. They include the equipment board, the customizable desktop organizers or the add-on modules for orga walls: Cegano will keep pace with change even in the future.

Within reach:
The height-adjustable equipment board, e.g., for a printer or a fax.

Stationery tray:
Always within reach. For quick, hand-written notes.

Monitor holder:
In various models, for TFT monitors with VESA standard.

The visitor reception point is available as a solo version with a round top for fastening to an individual table or as a duo version with a rectangular top for fastening to a double workstation. Regardless of whether your Cegano has a round-tube or square-tube frame, with C+P you can always remain flexible.

Flexible and durable:
The mobile high pedestal with its maxi-casters is always ready, wherever it happens to be needed.

Fresh

*Bright environment.
White furniture.
Revitalizing feature
colours. Discretion
and communication:
an office for ideas!*

Asisto drawer cabinets:
The ideal helpers for all filing and organizational tasks.

If you require visual and acoustic screening while ensuring that spontaneous communications are possible at the same time, then C+P wall systems are the perfect solution. All the necessary equipment can be integrated easily. The power and data supply, the monitor mounts and storage possibilities – everything is in or on the wall.

Concentrating and communicating.

The height of the desks can be adjusted to suit each individual employee. And thanks to the easy mobility of the walls, you can react quickly to any changes.

Asisto drawer fittings:

Drawer cabinets from the Asisto range allow you to tidily store all conventional types of organizational media – from the classic suspension file through to data carriers.

Do you have rapidly changing concentration and communication needs in your office? Then mobile sit/stand pedestals from the Asisto range are the right alternative – as a meeting point, a seat and valuable storage space. In this way, the range opens up new dimensions of efficiency and flexibility for creative project work.

Linear linking:

Available for walls of identical or different heights.

T-linking:

Available for walls of identical or different heights. Also possible as cross-linking.

The ultimate in technology.

The Cegano workstation system has been carefully thought through from A to Z and is absolutely peerless. Here is an overview of the most important characteristics and details:

Frame shapes

Two shapes – one system:
Cegano desk systems are optionally available with a round-tube frame...

... or a square-tube frame, just as you wish. Both variants are height adjustable from 650 - 850 mm.

Height adjustment

Raster height adjustment:
The height adjustment works quickly and simply with socket head screws...

... or a quick-action lock in the square-tube frame and is convenient to use.

Electric or pneumatic height adjustment

Comfort height adjustment:
The electric height adjustment from 650 - 1250 mm.

Exclusive height adjustment:
The electric height adjustment is available on request with memory control.

Double telescope (electric):
The Cegano version with electric height adjustment is fitted with a C-frame made of square tubes. Fitted with a double telescope, the desk offers a height adjustment range of 650 - 1250 mm.

Double telescope (pneumatic spring):
The Cegano version with pneumatic height adjustment is fitted with a T-frame made of rectangular tubes. It is also available with double telescope and a height adjustment range of 650 - 1250 mm.

Wiring technology

Cable aperture sockets:
Available in plastic or – as shown here – in metal with a stainless steel look and a brush seal.

Vertical cable routing:
Brings the cables securely and flexibly down to the floor.

Integrable technology box:
The technology box that can be integrated in the tabletop safely houses your power and data supply and provides extremely easy and direct access. Flap open – and all the cables and devices are quickly accessible for you. Flap closed – and the desk is immediately neat and tidy.

Add-on elements

CPU fixture:
The central PC unit is housed efficiently in this variable fixture; its height, depth and width can be adjusted.

Acrylic modesty panel:
The modesty panel made of satin-finish acrylic glass protects against curious glances.

Glass modesty panel:
On request, the modesty panel is also available in satin-finish toughened safety glass (TSG) or in steel.

Equipment board:
Always in reach: the height-adjustable equipment board, e.g., for a printer or a fax.

Visitor reception-point solo:
With a round top. For lateral attachment.

Visitor reception-point duo:
With a rectangular top, and rounded corners. For lateral attachment on two tables

Wiring:
Power and data flow always in the right place.

Multibox:
The practical fixture for notes and small parts.

Tray:
Available in A4 landscape and portrait format.

CD rack:
The most important data carriers always within reach.

It's your choice.

The Cegano range offers the right workstation for every application. Because we set great store by variability. You can bet our range has the right one for you, too.

Your C+P furniture adviser will be glad to give you more information and to demonstrate the ideal solution for you.

Frame models

Round-tube or square-tube, with height adjustment. Alternatively available as a sit/stand workstation with pneumatic (rectangular tube, T-frame) or electric (square tube, C-frame) height adjustment, both with single or double telescope.

Top shapes and sizes

From 800 x 800 to 2000 x 800 mm and from 1600 x 900 to 2000 x 900 mm.

Upgrade possibilities

Corner connectors, add-on tables, mobile occasional table and meeting table.

Workstation variants and wall systems

Height-adjustable occasional tables

Mobile occasional furniture

An ingenious combination.

You can choose from many attractive colour coatings at C+P as a standard feature. We are also always glad to fulfil all your own particular colour wishes. You can find the entire C+P colour and decor selection and additional information on the topic of colour design in the latest catalogue. Have fun choosing!

DPCB tabletop:
Standard desk, 25 mm thick as a directly coated particle board with a wood or solid decor and edge band.

HPL tabletop:
HPL (high pressure laminate) board, 16 mm thick.

Decors:
Many contemporary decors are available for the tabletops and cover plates.

Tabletop in real wood:
Three-layer fine particle board, 25 mm thick, with real-wood veneer and solid-wood edge.

Real-wood veneers:
The right choice for representative areas. Many contemporary veneers are available.

Frame colours:
The Cegano desk frames are available in the colour shades white aluminium, white and black-grey. They can be combined with runners in white aluminium, white, black-grey and chrome.

Incidentally:

C+P is a true specialist for tasteful and efficient furniture made of steel! Over several decades, we have developed a mastery of this field that is virtually unsurpassed. So it is hardly surprising that our customers have made C+P the market leader in several product segments.
