

Furniture for people

Sit. Stand. Move. *Workflow*

A sit/stand dynamic for everyone.

Sitting and standing. Guiding movement. Keeping healthy. Acting and communicating flexibly. Satisfying changing requirements. Supporting the flow of your work – from a fully flexible team office to a representative individual workstation. Workflow from C+P is all this – and more.

Classic:
Workflow sit/stand workstation system with a double-top concept.

Organized:
Modern office technology and accessories integrated perfectly.

Representative:
Management in motion: Workflow.

Inviting:
Team workstation with a platform
for spontaneous communications.

Efficient:
Optimize space,
motivate your staff.

Wall-centred:
Communications and concen-
tration in perfect harmony.

Open and accessible:
Divide up spaces flexibly
without sealing them off.

Workflow shapes rooms.

Workflow from C+P stands for an entire workstation system that offers you solutions for every room. Whether it is an individual or team office, a manager's office or a conference room, Workflow has an attractive, dynamic and functional answer for any furnishing task at any location.

Dynamic

The classic Workflow with double-top concept: a stand table, PC station and meeting point all in one.

Workdesk

Worklift

Workdesk and Worklift:

This **double-top concept** allows for healthy, ergonomic movements not only in theory, but also in practice!

Workdesk (left table element in illustration): The Workdesk is height adjustable from 680-790 mm and forms the basis for document-oriented work in a sitting position.

Worklift (right table element in illustration): The Worklift can be adjusted from sitting to standing height and makes it possible to change posture quickly between the Workdesk and the Worklift, without having to constantly raise and lower the desk.

Perfect setting:

The height adjustment of the Workdesk works quickly and easily on the T-frame...

... and on the rocker docked on the Worklift. Integrated scales make adjustments easier.

Cable trough:

The cable trough provides space for supply lines, connecting and data cables, power units and of course the multi-socket.

Manual operation:

The manual operation of the pneumatic lift column is quick, quiet and simple.

Cable aperture:

The Workflow cable flap maintains the dynamic design of the desk and helps to keep the work surface tidy.

Workflow moves people.

Thanks to the double-top philosophy of Workflow, it is possible to "stand up and stretch your legs regularly" without constantly having to raise and lower the table. And the stand table is also an excellent platform for efficient, brief meetings. As a result, ergonomics is not just a topic for a brochure, but a feature of everyday office life!

Representative

*Wherever you receive visitors,
you can show your best side
with Workflow.*

Reception situations in representative areas have their charms – and their pitfalls. Because, when it comes to that proverbial “first impression”, you will never get a second chance.

Attractive. Elegant. Workflow.

Workflow is also the ideal solution for the management secretary's office. Ergonomic and attractive at the same time, Workflow builds a bridge between design and function.

Discretion:
The modesty panel made of satin-finish acrylic glass. Light and elegant, it provides the desired cover.

T-frame, white aluminium:
All Workflow desk frames are coated in RAL 9006 white aluminium.

T-frame, chrome:
The refined, chrome-plated version is also available on request.

Real-wood top:
For management areas, the real-wood veneer on a slanted multiplex carrier plate is the ideal choice.

Workflow desks are an unusual eye-catcher – perhaps for your office, too. Apart from its many functional and design qualities, the range has one other essential characteristic: anyone who has ever worked on a Workflow will never want to use another desk.

Individual

Many decision-makers have a quite uncomplicated taste.

Ergonomics and function at the top level.

Demanding management tasks call for dynamic furniture. For furniture that radiates individuality and character, that stands out from the mass of exchangeable products – and that integrate functions elegantly. Workflow gains the top grade in all of these disciplines.

Cable flap on the Workflow:
The Workflow cable flap maintains the dynamic design of the desk, helps to keep the work surface tidy and is quick and easy to operate.

Cable trough on the Workflow:
The cable trough offers plenty of room for a convenient power supply. It can be connected and opened quickly and flexibly.

Splendid impression:
High-gloss coatings and striking handle elements make a strong statement on the Symbio equipment sideboard.

Symbio equipment sideboard:
The ideal supplement for integrating cutting-edge technology. Perfect in both design and function.

Symbio sideboard:
Satin-finish glass doors, technology integration, pull-out shelves, drawers – everything is combined beautifully.

In Workflow, presentation and functionality go hand in hand. With the desk, we have thought of everything – from the sit/stand philosophy through to the cable management. The elegant sideboard solutions complete the picture. Anyone working here will convey a sense of calm serenity and self-confidence: this is where the real decisions are made – starting with the furniture.

Team player

*Coordinating and designing,
discussing and agreeing – strong
teamwork needs an ideal basis.*

Elegant cable duct:
The power and data cables to the Worklift are housed efficiently in a flexible cable duct.

Electric motor:
The electric height adjustment is available on request with memory control.

Manual operation:
The manual operation of the pneumatic lift column is quick, quiet and simple.

Swivel footrest:
Provides support for the back when working standing up: the Worklift footrest can be swivelled by 180°.

Greeting and welcoming guests, or discussing brief points as you stand – the reception point for visitors is ideal for efficient, spontaneous communications while you are standing and can even be easily retrofitted to every Workdesk.

Achieving more together.

Just as smart are the many different solutions for configuring the desks (e.g., as a corner combination) and for integrating the latest office technology within perfect reach. Workflow is therefore superbly suited to modern group offices where all the various forms of team and project work are on the agenda. Because creative furnishing solutions inspire creative thinkers!

Within reach:
The height-adjustable equipment board on the Workdesk, e.g., for a printer or a fax.

Efficient

*An ideal combination:
Optimize space and motivate
your staff.*

More room in less space:
The practical tall pull-out cupboard offers privacy from the aisles and access to all important documents.

Everything within easy reach:
Professional storage space close to the work area: With security compartment, material compartment, filing drawer for suspension files and binder shelf, everything is within easy reach.

Storage space just where you need it.

Intelligent cupboard systems support the sit/stand philosophy of C+P. The tall pull-out cupboard, for example, helps to optimize space while at the same time creating useful storage space and allowing your staff to concentrate at their desks. On the other hand, it offers a platform for brief meetings or a quick coffee break, or just an opportunity to „stretch your legs“ to relieve strain on the spine. Pure ergonomics – exactly where it is needed!

Patented acoustic tambour:

Absorbs the noise, improves the acoustics – and looks good whilst doing so: the smooth-running and patented special tambour in award-winning design absorbs the lion's share of the noises that occur in everyday office life. It can absorb nearly seven times as much noise as a conventional cupboard in many frequency ranges.

The acoustic non-woven cladding on the inside of the perforated profile absorbs some of the energy emitted by the sound waves upon penetration and, at the same time, prevents it from re-emerging. This considerably reduces the reverberation period in the room.

Mobile and lockable:

Smooth-running, elegant casters with locks make your storage space mobile and convenient.

Wherever you work, you also need cupboard space. So it's great if mobile side cupboards are available at desk height. That supports smooth work processes – and the additional advantage as a stand desk promotes healthy movement in the office. Acoustically effective surfaces help to create optimum working conditions.

The Workflow Solo desks are ideal for combining with tall pull-out cupboards and mobile storage space. These flexible individual tables are supplied in two frame types with many different top shapes – on request, they can even be on casters for quick adjustments to suit any short-term changes.

Workflow Solodesks:

You can choose between a T-frame and an A-frame design. Both are height adjustable from 680 to 820 mm in 10-mm steps.

Undisturbed

Ideal for switching between concentrating and communicating: configurable walls and mobile tables.

Short-term projects, evolving teams, rapidly changing needs for concentrating or communicating – all of these factors are becoming more and more characteristic of modern office life.

Concentrating and communicating.

With Workflow, you are well equipped for the demands of the future. While the Workflow equipment wall integrates everything from the power and data supply to the necessary organisational aids, the Workflow Solodesks act as flexible platforms. In this way, the range opens up new dimensions of flexibility and efficiency for project work.

Apart from the actual workstation, temporary discussion zones are becoming more important than ever. They can be created in the twinkling of an eye with the mobile Solodesks or with the mobile Workflow meeting tables. Here, again, the sit/stand concept that encourages health and movement is fully maintained. Simple is often brilliant.

Solodesk frame variants

T-frame:
The filigree T-frame is adjustable from 680 to 820 mm in 10-mm steps.

A-frame, without casters:
The design alternative to the T-frame variant.

A-frame, casters on one side:
For quickly moving the desk by simply raising it.

A-frame, casters on both sides:
Full mobility and extremely simple handling thanks to four lockable casters.

A-frame height adjustment:
The height can be adjusted from 680 to 820 mm in 10-mm steps.

Casters for A-frames:
All caster frames are fitted with smooth-running, lockable casters.

Multifunctional

Workflow partition walls allow you to divide space into zones, integrate technology and provide visual and acoustic screening.

Anyone who has to reposition furniture frequently does not want to have to tackle all the cable and technology installations every time. There must be any easier way!

Perfectly organized.

The Workflow equipment and organisation walls offer the perfect solution: a complete power and data supply, a monitor holder and keyboard tray, a pen tray and binder holder – all in and on the wall. The desktop remains free for the important things.

Monitor holder:
In various models, for TFT monitors with VESA standard.

Wiring:
Power and data flow always in the right place.

Keyboard tray:
Keeps the valuable desktop free when the PC is not in use.

Pen tray

Binder holder

As the wall and desk are independent of each other, the height of the desk frames, for instance, can be set individually for each employee. This is flexible and, above all, future-proof office furniture.

Another valuable benefit of the Workflow wall systems is their function as space dividers, for defining pathways and creating space zones. Thanks to their ease of mobility, you can react quickly to changed situations once again

With the various materials – from acrylic glass to foam glass – it is even possible to satisfy demanding needs in terms of visual and acoustic screening.

The ultimate in technology.

The Workflow workstation system has been carefully thought out from A to Z and is absolutely peerless. Here is an overview of the most important characteristics and details:

Worklift height adjustment

Height adjustment with electric motor:
The electric height adjustment from 720 to 1160 mm is available on request with memory control.

Height adjustment with pneumatic spring:
The manual operation of the pneumatic lift column is quick, quiet and simple.

Add-on elements

CPU holder, desk:
For assembly under the tabletop; adjustable. With adjustable and lockable retaining strap.

Acrylic modesty panel:
The modesty panel made of satin-finish acrylic glass protects against curious glances.

Glass modesty panel:
On request, the modesty panel is also available in satin-finish toughened safety glass (TSG) or in steel.

Frame panel for T-frame:
For lateral wiring. With cable duct and strain relief.

Wiring technology

Flexible cable duct:
For the elegant routing of the power and data cables from the Workdesk to the Worklift.

Cable aperture sockets:
Available in plastic or – as shown here – in metal with a stainless steel look and a brush seal.

Vertical cable routing:
Brings the cables securely and flexibly down to the floor.

Solo desk cable flap:
Made of aluminium, coated in the colour of the frame.

Frames: Workdesk-Worklift cross-bar connection and design

Connection of Workdesk to Worklift:
The Workdesk cross bar is simply positioned on the rocker on the Worklift and fixed with a bolt...

... and then simply locked with an Allen screw. The system can be extended into a corner combination just as easily!

Workdesk height adjustment:
The height adjustment of the Workdesk works quickly and easily on the T-frame...

... and on the rocker docked on the Worklift. Integrated scales make adjustments easier.

Workdesk and Solodesk frame variants

T-frame:
The filigree T-frame is adjustable from 680 to 790 mm (Solodesk to 820 mm) in 10-mm steps.

A-frame (optionally with casters):
The design alternative to the T-frame variant. Available with casters on one side or both sides.

A-frame height adjustment:
The height can be adjusted from 680 to 790 mm (Solodesk to 820 mm) in 10-mm steps.

Casters for A-frames:
All caster frames are fitted with smooth-running, lockable casters.

Equipment board:
Always in reach: the height-adjustable equipment board on the Workdesk, e.g., for a printer or a fax.

Visitor reception-point duo:
With a rectangular top, and rounded corners. To be fastened at the sides to two Workdesks or Solodesks.

Visitor reception-point solo:
With a round top. To be fastened at the sides to a Workdesk or Solodesk.

Mobile pedestal with seat:
As a visitor seat, which is quickly available directly under the desk. Seat made of leather, upholstered.

Worklift cable trough:
The cable trough for power and data cables, power units and sockets – for quick connection and removal.

Worklift cable flap:
The stainless steel Workflow cable flap maintains the dynamic design of the desk and helps to keep the work surface tidy.

It's your choice.

The Workflow range offers the right workstation for every application. Because we set great store by variability. You can bet our range has the right one for you, too.

Your C+P furniture adviser will be glad to give you more information and to demonstrate the ideal solution for you.

Workdesk/Worklift desk combinations

Top shapes and sizes

Workdesk/Solodesk frames

Designs a, b and c for Workdesk; a, b, c, d, and e for Solodesk

Workstation variants with Solodesk and wall system

Height-adjustable occasional tables

Mobile occasional furniture

An ingenious combination.

You can choose from many attractive colour coatings at C+P as a standard feature. We are also always glad to fulfil all your own particular colour wishes. You can find the entire C+P colour and decor selection and additional information on the topic of colour design in the latest catalogue. Have fun choosing!

Frame colours:

The Workflow desk frames are available in RAL 9006 white aluminium. We can also supply the chrome-plated model on request.

DCPB tabletop:

Standard table, 25 mm thick as a directly coated particle board with a wood or solid decor and edge band.

HPL tabletop:

HPL (high pressure laminate) board, 13 mm thick, rounded off downwards.

Alu-Compact tabletop:

HPL (high pressure laminate) board, 13 mm thick, with aluminium inlay for high durability and a refined look.

Tabletop in genuine wood:

Multiplex carrier plate, 25 mm thick, with real-wood veneer and slanted edge.

Decors:

Many contemporary decors are available for the tabletops and cover plates.

Real-wood veneers:

The right choice for representative areas. Many contemporary veneers are available.

Incidentally:

C+P is a true specialist for tasteful and efficient furniture made of steel! Over several decades, we have developed a mastery of this field that is virtually unsurpassed. So it is hardly surprising that our customers have made C+P the market leader in several product segments.
